# The Seventh Mathematics of Networks Meeting

27th June 2008 University of Bristol
Deadline for abstracts: 21st March 2008

This interdisciplinary series of meetings allows networking researchers from many backgrounds to meet and exchange ideas in an informal atmosphere. Previous meetings have had presentations from topics including biology, urban planning and telecommunications networks as well as applied mathematics.

Slides and abstracts from previous talks can be found at the website.

The meeting is completely free but registration via email beforehand is compulsory.

Invitation to speak

We invite potential speakers to submit a title and abstract describing their talk (deadline 21st March 2008). The theme of this Mathematics of Networks meeting is transport networks. Talks may be on any topic about networks but should be of general interest to the community of networks researchers. Preference will be given to talks meeting the theme of transport networks.

Organisers
Keith Briggs (keith.briggs@bt.com)
Richard Clegg (richard@richardclegg.org)
